# After submission, what to do:

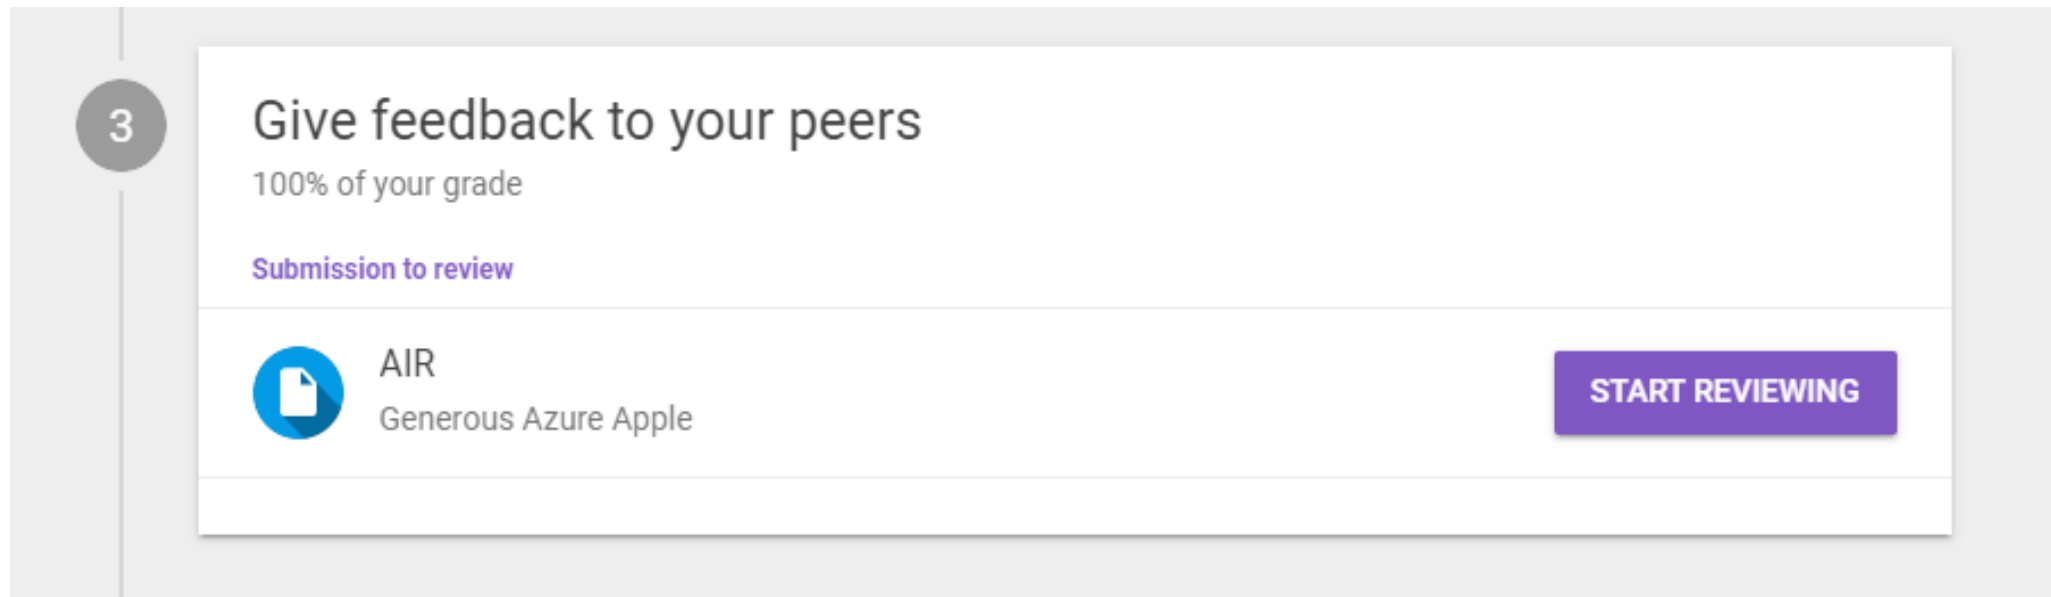

- **Peer discussion:**
  - During your enrolled computer labs
  - Tutor will record your attendance in discussion for marking
- **Feedback for 2 peers:**
  - Overall comment section (1 for each peer is mandatory)
    - *This overall feedback should cover all questions available for this submission. You are to explain at least 1 aspect which has been completed well and 1 aspect which could be improved. Also, explain how the aspect could be improved.*
  - Rubric Section
    - *Only rating (excellent, good & poor) – not added to markcentre*
    - *Comment is optional*
- **Feedback review:**
  - Read review section
  - Write a short reflection (min 3 words)

No peer marking, marks  
come only from your own  
activities!

Once the due date for submissions have passed you will be able to give feedback to your peers.

If the submissions and reviewers are set to be anonymous then you will be given a fruit name 'Generous Azure Apple' in this example.

To begin your peer review you click on the 'Start Reviewing' button.

You will be shown the peers work to review and then you will be required to [rate the work and/or write a comment](#).

It might look something like this:

You can click on the 'WRITE' button to write a comment.
